2022 Utility Transformation Program of the Year

Eligibility Period: April 1, 2021 - June 1, 2022

This award recognizes impactful, innovative, and replicable utility programs that empower customers to engage in the clean energy transition. Program attributes may include, but are not limited to, efforts to facilitate and incentivize customer engagement, strategies to bolster climate resilience, or approaches to accelerate customer electrification and adoption of carbon-reduction technologies.

1. Describe how this nominee has empowered customers to engage in the clean energy transition.

2. Describe any challenges and how these obstacles were overcome.

3. How might others replicate these efforts?

4. In 50 words or less, summarize the nominee's efforts.

5. Add up to three links to supporting documentation (optional)

2022 Utility Transformation Project of the Year

Eligibility Period: April 1, 2021 - June 1, 2022

This award recognizes ambitious utility projects that advance carbon-reduction progress by leveraging innovative technologies and replicable approaches.

1. Describe how this nominee has demonstrated industry leadership to advance carbon-reduction progress.

2. Describe any challenges and how these obstacles were overcome.

3. How might others replicate these efforts?

4. In 50 words or less, summarize the nominee's efforts.

5. Add up to three links to supporting documentation (optional)

2022 Utility Transformation Leader of the Year

Eligibility Period: April 1, 2021 - June 1, 2022

This award recognizes an individual who, while working at an electric utility, has demonstrated leadership to advance clean energy, enable grid modernization, and engage customers, technology partners, peer utilities and regulators. The individual's 'body of work' can span a longer period of time, but the nomination should focus on activity and accomplishments during the eligibility period.

1. Describe how this nominee has demonstrated leadership to advance clean energy, enable grid modernization, and engage customers, technology partners, peer utilities and regulators.

2. Describe any challenges and how these obstacles were overcome.

3. How might others replicate these efforts?

4. In 50 words or less, summarize the nominee's efforts.

5. Add up to three links to supporting documentation (optional)

2022 Utility Transformation Partner of the Year

Eligibility Period: April 1, 2021 - June 1, 2022

This award recognizes a non-utility product or service provider that, in partnership with one or more utilities, has demonstrated leadership to catalyze utility transformation and progress towards a modern, carbon-free energy future.

1. Describe how this nominee, in partnership with one or more utilities, has demonstrated leadership and championed progress towards a modern, carbon-free energy future.

2. Describe any challenges and how these obstacles were overcome.

3. How might others replicate these efforts?

4. In 50 words or less, summarize the nominee's efforts.

5. Add up to three links to supporting documentation (optional)

2022 SEPA Diversity, Equity & Inclusion Award

Eligibility Period: April 1, 2021 - June 1, 2022

SEPA is committed to a diverse and inclusive industry. We believe that diversity, equity, inclusion and access for all are required for a fair and just carbon-free energy future.

This award recognizes organizations, project teams and/or individuals who have demonstrated unique leadership in efforts to advance DEI principles and programs - either at their own organizations or with their customers.

1. Describe how this nominee has demonstrated leadership to significantly advance the principles of diversity, equity, inclusion and access.

2. What makes their initiatives unique or innovative?

3. How might any of these initiatives be replicated by others?

4. In 50 words or less, summarize the initiative, program or efforts that should be recognized.

5. Add up to three links to supporting documentation (optional)
